

Kart Mini of America to sponsor ICA class in 2006 FL Winter Tour

Oswaldo Negri of Kart Mini: "To me and Kart Mini it is an immense challenge to compete in the Formula Kart Florida Winter Tour. As we found out in the last two years, it is incredibly competitive, and knowing what I know about racing and having the experience of many years in different forms of amateur and professional motorsport, that is the place I want to be. I'm sure Formula Kart will break a record again of number of drivers, and hope that the competition will be as tough as it has been, so we can improve on our equipment and drivers"

Kart Mini is a Brazilian based company with a long history of producing Championship winning chassis, dating back to 1966 when Maneco Cambacau and Wilsinho Fittipaldi, Jr created the Kart Mini brand. Today, Kart Mini of America continues that winning tradition by providing the best chassis and driver support systems in the karting business.

"I am thrilled to have Oswaldo and Kart Mini of America return as a class sponsor again in 2006,"states FK's Bill Wright. " I think it is important for our sport that professionals like Oswaldo are involved, and look forward to working with him to help promote the Kart Mini chassis line."
